

Career opportunities for B.Tech students

The importance of acquiring practical skills along with the theoretical knowledge is becoming increasingly evident in the current job market. The industry is looking for graduates who are not only academically sound but also possess the necessary skills to excel in their respective fields.

Students are encouraged to explore various career paths and gain hands-on experience through internships and projects.

By focusing on both theoretical knowledge and practical skills, students can better prepare themselves for the challenges of the modern workforce. The industry is looking for graduates who are not only academically sound but also possess the necessary skills to excel in their respective fields.

Two cutting-edge B.Tech programmes for students launched

Madhya Pradesh University, Bhopal, has launched two specialized B.Tech programmes in partnership with global leaders IBM and Larsen & Toubro (L&T). These new offerings are designed to equip students with advanced, industry-relevant skills in the fields of Artificial Intelligence and Civil Infrastructure.

B.Tech in Advanced Artificial Intelligence will immerse students in emerging technologies such as generative AI, cloud computing, and large language models. The program includes hands-on training using hybrid labs, and access to globally recognized certifications.

B.Tech in Infrastructure Transportation focuses on the design, planning, and construction of transportation systems. Students will gain expertise in infrastructure planning, sustainable transport planning, and intelligent infrastructure solutions.

These programmes represent a transformative step towards building a future-ready workforce," said Prof. Patrick. "By integrating our curriculum with global industry standards, we aim to give our students a competitive edge in the job market."

48,000+ exercise web options in EAPCET counselling

Over 92,800 candidates attended certificate verification and about 48,700 candidates exercised web options in the ongoing first phase of TG EAPCET 2025 admission counselling, as of Tuesday. The last date for exercising options is July 10. Candidates are required to pay the processing fee and book a slot to attend certificate verification and exercise as many options as possible to get allotment in a better college/ course. The total number of options exercised till now, according to Commissioner, Technical Education, is 22,86,517. The maximum number of options exercised by a candidate until Tuesday was 720. The mock seat allocation would be done on or before July 13, and provisional allotment will be made before July 18. Payment of tuition fee and self-reporting via website will commence from July 18. More information can be had from the official website (<https://tgeapcet.nic.in>).

నేటితో ముగియనున్న ఎప్సెట్ కౌన్సెలింగ్
