A MASTERCLASS ON NEW TRENDS IN CYBER SECURITY

4.30-6.00 pm : 22 July 2020 (Wednesday): CISCO Webex

Background:

The digital economy today comprises 14-15% of India's total economy, and is targeted to reach 20% by 2024. The transformational Digital India push as well as Industry 4.0 is required to be supported by a robust cyberspace. However, Cyber intrusions and attacks have increased in scope and sophistication targeting sensitive personal and business data, and critical information infrastructure, with impact on national economy and security.

The present cyber threat landscape poses significant challenges due to rapid technological developments such as Cloud Computing, Artificial Intelligence, Internet of Things, 5G, etc. New challenges include data protection/privacy, law enforcement in evolving cyberspace, access to data stored overseas, misuse of social media platforms, international cooperation on cybercrime & cyber terrorism, and so on.

The Masterclass will focus on presenting a Cyber Security landscape in India, Current Challenges, Technology Innovations, new opportunities and how organizations could thrive in the current digital era.

Keynote Speaker

Mr. Deepak Talwar
National Security Officer
Microsoft

Deepak Talwar is the National Security Officer with Microsoft India. He has close to 20 years of experience as a business leader and core technologist from heart. He is working in the field of cyber security and specifically focused on cloud security. Deepak has been instrumental in transforming multiple clients & the partner community to migrate to safer cloud and worked across sectors like BFSI, government, public sector, telco- media and others covering Indian and global markets. Deepak is also a distinguished trainer who had trained 100's of engineers in his career to be cyber experts and even today he firmly believe and actively participate in building next generation to attain best of cyber knowledge and "be cyber ready"
