

I, KGSR Prajwal 3rd Year Mechanical Engineering Student, School of Engineering, Anurag University, Hyderabad, recently completed a Blockchain Course offered by SCDE,JNTUH Online Certificate Course. It was a 6 month course from September 2022 to March 2023. It is an excellent program and I highly appreciate all the faculty who explained the concepts very patiently. Concepts covered were clear enough. Pace of teaching was very good. This training helped me easily to understand the core concepts of CryptoCurrency and Blockchain Technology and gained a good understanding of the concepts. The training provided hands-on experience and has helped me to develop a strong base in the domain. Course is designed in a way where a faculty/students from any background can easily understand and most importantly apply the concepts of Blockchain Technology. Assignments are designed in a way where we can apply and revise all the concepts learned. We were also provided with recorded sessions for those who couldn't listen to the class. The video content motivates us in solving the assignments. The timings were flexible too. Special Thanks to SCDE,JNTUH for organizing this program very well.
